

## ColibriDecoWall 250gsm

ColibriDecoWall digital wallpapers are made on the highest quality materials and stand in the highest regulation standards. The 50 meters of wall covering are conveniently wound on 76 mm cores that allow easily installation on the printer and several hours of unstoppable productivity. Benefit from the convenience of premium non-woven backing that dominates in the wallcoverings world. It allows to apply and to remove wallcoverings easily. The hot embossed surface structure appears particularly sharp and realistic as well as it is robust and scratch resistance.
